

BUILD A MORE SECURE, BETTER PERFORMING NETWORK

There's never been a better time to prioritize network security and performance. At Hydrasat, we're on a mission to help manufacturers leverage modern network technology to become more secure, efficient, and competitive organizations.

WE'LL HELP YOU OVERCOME KEY CHALLENGES

With a growing number of cyberthreats and increased network demands, many manufacturers (and their networks) struggle to keep up.

MORE SECURITY THREATS

Manufacturing is among the top five most attacked industries over the past five years¹ and most companies aren't aware of all their security gaps.

MORE NETWORK DEMANDS

IoT, automation, and cloud technologies are hogging bandwidth and make industrial networks more complex and expensive to manage.

MORE OPERATIONAL COMPLEXITY

Manufacturers of all sizes don't always have the resources or expertise to effectively manage and secure their networks on their own.

IF ANY OF THESE ARE CHALLENGES WITHIN YOUR ORGANIZATION, HYDRASAT CAN HELP.

WE'RE PROVEN AND PROFICIENT IN THE MANUFACTURING INDUSTRY

At Hydrasat, we are built to help manufacturing organizations become more secure, efficient, and competitive.

We bring decades of experience and intelligent process to every engagement

We're focused on security and SD-WAN for industrial and manufacturing networks

We can fully manage your network and security if you lack the bandwidth or resources

WITH SD-WAN AND NETWORK SECURITY SOLUTIONS, WE CAN HELP YOU:

Reduce WAN costs

Increase network bandwidth and uptime

Centralize network management

Minimize exposure to advanced cyberthreats

Reduce overall operating expenses

BEST-IN-CLASS NETWORK AND SECURITY SOLUTIONS

We combine our industry experience with best-in-class solutions from Cisco to address the technology challenges that hold manufacturers back from building and managing a more secure, better performing network.

SOFTWARE-DEFINED WAN (SD-WAN)

Maintain app performance and adapt to changing conditions without direct IT oversight.

- Add bandwidth and failover through broadband or 4G / LTE
- Prioritize WAN traffic based on needs
- Improve the performance/connectivity of cloud apps
- Gain more insight into your devices and IoT/OT endpoints
- Share data with suppliers and locations more securely

NETWORK SECURITY SOLUTIONS

Protect your operations, users, and IP from external and internal threats with end-to-end security.

- Stop threats over all ports/protocols with Cisco Umbrella
- Protect against known/unknown threats with Cisco NGFW
- Protect your devices and endpoints with Cisco AMP
- Stop phishing and ransomware with Cisco Email Security
- Implement cloud-managed security with Cisco Meraki
